ELSEVIER

Journal of Microbiological Methods 30 (1997) 263–264

Journal of Microbiological Methods

Contents of Volume 30

No. 1, July 1997

Preface

Substrate utilization tests in microbial ecology. A preface to the special issue of the Journal of Microbiological Methods
H. Insam (Austria) 1

Research papers

Comparison of substrate utilization assay and fatty acid analysis of soil microbial communities
J.S. Buyer and L.E. Drinkwater (USA) 3

A modification of a method to determine adenosine nucleotides in forest organic layers and mineral soils by ion-paired reversed-phase high-performance liquid chromatography
J. Dyckmans and M. Raubuch (Germany) 13

Microbial functional activity during composting of chlorophenol-contaminated sawmill soil
M.M. Laine, H. Haario and K.S. Jørgensen (Finland) 21

Use of rhizosphere carbon sources in sole carbon source tests to discriminate soil microbial communities
C.D. Campbell, S.J. Grayston and D.J. Hirst (UK) 33

Available carbon in soil determined from substrate utilization kinetics: comparison of substrates and soil amendments
L. Badalucco and D.W. Hopkins (Italy, U.K) 43

Evaluation of community-level catabolic profiling using BIOLOG GN microplates to study microbial community changes in potato phyllosphere
H. Heuer and K. Smalla (Germany) 49

Statistical analysis of the time-course of Biolog substrate utilization
C.A. Hackett and B.S. Griffiths (UK) 63

Statistical comparisons of community catabolic profiles
E. Glimm, H. Heuer, B. Engelen, K. Smalla and H. Backhaus (Germany) 71

Application of multivariate analysis of variance and related techniques in soil studies with substrate utilization tests
W. Hitzl, M. Henrich, M. Kessel and H. Insam (Austria) 81

Using the Gini coefficient with BIOLOG substrate utilisation data to provide an alternative quantitative measure for comparing bacterial soil communities
B.D. Harch, R.L. Correll, W. Meech, C.A. Kirkby and C.E. Pankhurst (Australia) 91

No. 2, August 1997

Research Papers

Incubation time and media requirements of culturable bacteria from different phylogenetic groups
H. Mitsui, K. Gorlach, H.-j. Lee, R. Hattori and T. Hattori (Japan) 103

Increasing the efficiency of the plate counting method for estimating bacterial diversity
G.M. Balestra and I.J. Misaghi (Italy, USA) 111

Parameters associated with optimum two-step freezing of rumen ciliate *Entodinium caudatum*
S. Kišidayová (Slovak Republic) 119

An inexpensive chemostat apparatus for the study of microbial biofilms
M. Whiteley, E. Brown and R.J.C. McLean (USA) 125

Isolation of acetone/ethylene glycol utilizing and biofilm forming strains of bacteria
J. Masák, A. Čejková and V. Jirků (Czech Republic) 133

Laboratory methods for studies of bacterial adhesion
Y.H. An and R.J. Friedman (USA) 141

Rapid detection of *Enterobacteriaceae* in urine by fluorescent 16S rRNA in situ hybridization on membrane filters
M.W. Mittelman, M. Habash, J.-M. Lacroix, A.E. Khoury and M. Krajden (Canada) 153

Short communications

The Winogradsky plate, a convenient and efficient method for the enrichment of anoxygenic phototrophic bacteria
P.J. Charlton, J.E. McGrath and C.G. Harfoot (New Zealand) 161

Preparation of mitochondrial DNA from fungal protoplasts
Z. Hamari, I. Pfeiffer, F. Kevei and L. Ferenczy (Hungary) 165

Survival and activity of *lac-lux* marked *Pseudomonas aeruginosa* UG2Lr cells encapsulated in κ-carrageenan over four years at 4°C
M.B. Cassidy, H. Lee and J.T. Trevors (Canada) 167

Erratum

Erratum to "Determination of intermediary metabolites in *Aspergillus niger*" [J. Microbiol. Methods (1996) 295–302]
G.J.G. Ruijter and J. Visser (Netherlands) 171

Instructions to Authors

No. 3, September 1997

Research papers

A multiple chemostat system for consortia studies on microbially influenced corrosion
P. Angell, W.J. Machowski, P.P. Paul, C.M. Wall and F.F. Lyle (USA) 173

Investigation of the potential for microbial contamination of deep granitic aquifers during drilling using 16S rRNA gene sequencing and culturing methods
K. Pedersen, L. Hallbeck, J. Arlinger, A.-C. Erlandson and N. Jahromi (Sweden) 179

Use of confocal laser scanning microscopy on soil thin-sections for improved characterization of microbial growth in unconsolidated soils and aquifer materials
P.C. DeLeo, P. Baveye and W.C. Ghiorse (USA) 193

Efficient insertional mutagenesis in group A streptococci mediated by Tn*917* transposon
Z. Li, J.A. Gutierrez, A.S. Bleiweis and M.D.P. Boyle (USA) 205

A comparison between total viable count by spread plating and AquaPlak® for enumeration of bacteria in water from a shrimp farm
A.L. Guerra-Flores, A. Abreu-Grobois and B. Gomez-Gil (México) 217

Susceptibility assays of *Candida tropicalis to miconazole*
N. Simonetti, G. Simonetti, V. Strippoli, A. Callari and M. Tecca (Italy) 221

Short communication

The interphase technique: a simple method of cell immobilization in gel-beads
A. López, N. Lázaro and A.M. Marqués (Spain) 231

Abstracts of the Second European Meeting on Diagnostic PCR 235
